- $25 All Students (Must bring Student ID)

**Goal:** Review the scope of issues regarding the impact of legalization of cannabis on youth and emerging adulthood in clinical practice and advocacy.

**Delivery Format:** Live training program

**Lecture Overview:** New Jersey is moving rapidly down the path towards at least decriminalization for possession of cannabis and possibly recreational use by adults. This program addresses issues related to the impact of further marijuana legalization and commercialization on youth and emerging adults. Multiple perspectives on the impact will be presented with the expectation that active dialogue will occur to further elaborate upon this vital area of public health.

**Objectives:** At the conclusion of this course, the participant should be able to:

1) Define terminology that is employed in the discussion of the legalization issues.
2) Review the neuroscience and pharmacology impact of cannabis action on the developing adolescent and emerging adult brain.
3) Review potential therapeutic uses for medical marijuana, evidence evaluating medicinal cannabis safety and effect, and different approaches taken by states to permit medical marijuana use.
