

Study Location: 671 Hoes Lane, Piscataway, NJ
Study Investigator: Steven Silverstein Ph.D.

Volunteers Wanted

UBHC scientists are looking for volunteers for a research study on the effects of **high genetic risk for schizophrenia** on language and vision.

Adolescents (age 12 to 21 years) of a biological parent with or without an established diagnosis of schizophrenia AND their parent may be eligible.

The study involves 2 sessions: The first session is a psychiatric interview that lasts about 1.5 hours. The second session involves a non-invasive eye exam that lasts about 1 hour.

- *At the first session, the parent will complete surveys.*
- *Participants are paid \$15/hour for both sessions.*

For more information, or to see if you qualify, please call Caren Alexander at (732) 235-9297
