Are you dealing with unusual thoughts? Interested in participating in a study about brain function?

You may be eligible to participate, if you are between the ages of 18 to 40 and have experienced psychotic-like symptoms such as:

- Unusual thoughts
- Suspiciousness
- Perceptual disturbances, like hearing things that others do not

The study about brain function includes:

- Computer exercises, pen/pencil tasks
- Lumbar Puncture
- Brain imaging (MRI)
- Blood Draw

Participants will receive:

- Compensation for participation

To Participate please contact the Study Research Coordinator at 212-659-1674 or ssbc@mssm.edu
