Eligibility:

• 18 years or older

• NO personal or family history of Schizophrenia or Bipolar

Study Procedures:

• Complete a screening questionnaire on personal and family health history

• Give a small blood sample

• Be compensated for your time and effort

Research has shown that genes can make some people more likely than others to develop Schizophrenia or Bipolar Disorder. The goal of this study is to identify these genes. Individuals **WITHOUT** these disorders are invited to join the study as control subjects. Since this is a genetic study, control subjects cannot have a family member with one of these illnesses.
